WEATHER IN THE MOUNTAINS IN NOVEMBER

The Woods got some nice rains in November.

About 4200 feet elevation, the snow was coming down.

Mary and Roger Wooten took a few trips up to the snow and shared some shots of the snow on Facebook.

This one I thought was very pretty. So I am sharing it with you.

FALLEN TREE

A small diameter tree fell across Cascadel Drive near the bridge. Our helpful neighbors Mary and Roger Wooten were the first to come upon the tree. They pulled it off the road with their trusty quad. Thank you both for clearing the road for our neighbors.

FIREWISE

Thanks to those who reported your hours in 2025 for fuel mitigation. The hours were reported to the NFPA Firewise Website in November. We were approved as a Member in Good Standing for the fifteenth year.

Well Done Cascadel Heights and Cascadel Woods!!!

You can find the new certificate on our website at:
<https://cascadelinternet.com/water/national-fire-protection-association-certified-firewise-community-since-2010/>

Scroll down the page to the Recertification for 2025.

Any work you do now and till November of 2026 should be reported to Carol Eggink at egginks@netptc.net or text me at 559-676-3783.

THE CHRISTMAS PARTY

Our decorating crew, Toby Delaney and Lisa Wood, should be decorating the clubhouse the first week of December. All outdoor decorations will remain up until after the New Year for the enjoyment of our community. I believe the tree will remain as well so it can be viewed through one of the windows.

It looks like we will have about 40 – 50 people attending the Party this year.

Remember to bring your place settings, (flatware, plates, and glasses) along with a pot luck dish. Sodas, water and coffee will be there and the main dish of turkey and ham will also be supplied.

We are looking forward to a fun night.

REMINDERS

Winter is almost here. Be sure to protect your outside water pipes from freezing.

If you are going to be leaving for more than a few days be sure to shut off your water at the meter box and drain the house from the lowest point outside.

If you turn off your water, it is also suggested that you either turn your water heater off or place it in "vacation" mode. This can prevent over pressurizing the pipes inside your house from the heated water.

If you have or see any water problems, need help turning off your water or realize after leaving that you have forgotten to turn off the water please call Stan @ 559-321-6969 so he can turn the water off for you. Thank You.
