CMWC FIREWISE

CAL FIRE Crews have been clearing, piling and burning for us in some of the open areas. There is so much more to get cleared before the open burning season ends. If burning ends before we complete the clearing, we may cease the clearing. Weedeating and mowing will continue.

The CSA Mowing began in mid May. Thanks to the Davino family for the loan of the tractor and bush mower again this year. Thanks to Stan

Eggink for volunteering his time to do the work.

The CAL FIRE Crew finished weedeating the Fuel Break at the entrance of Cascadel Woods. They will be helping out

with the easement clearing and then move to the CSA open areas where the Bush Mower cannot get.

We are fortunate to have them for the entire week beginning May 27 through May 31.

We will be coordinating with Madera County for the Road 233 annual event, as soon as we are informed on the schedule of the Fire Crews for June. This will include Cascadel Heights and this year we hope to add Peckinpah. We are working with their Association President to make arrangements.

FIREWISE ANNUAL COMMUNITY BBQ

The Annual BBQ is set for June 22 to be held at the clubhouse front yard from 11 am to 2 pm.

As always, it is a potluck affair. Bring your favorite potluck dish to share. The Firewise Committee will provide hot dogs and burgers with all the condiments. We will also provide beverages, paper plates, and plastic ware. We hope to see you there.

POND FISHING

Some of our younger residents are getting into fishing this year. Liam, son of Joy and Graham, can be seen walking to the pond with pole in hand many mornings. Here we see he caught a fish. Congratulations Liam.

(Photo by Joy Callahan)

Passing the pond one day, I find Axel Paquette with pole in hand fishing at the pond. His father, Jacob along with one of his sisters, Paisley and one of his brothers, Urban were there as well. This photo shows Axel with the pole and his younger brother Urban waving hello for the camera.

CMWC SYSTEM REPAIR

A water leak was discovered near the bridge while weedeating the area. This was a big job to repair. A lot of equipment was used to excavate the area to get to the broken pipe. Once the pipe was uncovered, the repairs were made. The tanks recovered to full capacity in two days.
